Policy

We do not share any private information given to us to a third party.

We post new proxies every two minutes on the main page and daily on all the other pages.

We permit users to post individual, or lists of proxies. Any proxies posted will be added to today's list on the main page if they pass the verification tests.

We block the IPs of scripts that access our pages if they exceed the 100 pages per day, or the 10 pages per hour, limit.

Any HTTP proxies posted at ultraproxies.com must first be verified, so other than SOCKv4/5, if they appear on this site you can be sure they are proxy servers and were working as of the date and time posted beside them under the heading Tested. We don't test the SOCK proxies as yet. Once we get the site working the way we expect it should we will introduce SOCK testing as well. However, we do accept and update our SOCKv4 and SOCKv5 pages daily.

If there is enough interest a chat room will be added to the site to let users communicate with one another as well as post proxies. For now any proxies posted are anonymous, but if there is interest from the posters to have that changed we'll add a member's area to permit posters credit for the proxies they provide.

We welcome anyone in the community that wants to participate and thank you in advance for any proxies and thank you again for any already posted.

You can view our Terms Of use document at <http://ultraproxies.com/termsfuse/termsfuse.pdf>
